 yuktapoojary57@gmail.com

Professional Summary

Aspiring Data Analyst with hands-on experience in data analysis, dashboard development, business intelligence reporting, and data visualization. Proficient in SQL, Power BI, Python, Excel, DAX, and Power Query. Skilled in transforming raw data into actionable insights through data cleaning, modeling, KPI tracking, and interactive reporting. Seeking an entry-level Data Analyst opportunity to apply analytical and problem-solving skills in a professional environment.

EDUCATION

Shivajirao S. Jondhale College of Engineering

B.E Artificial Intelligence and Machine Learning with 8.33 CGPA

2021-2025

V.P.M college of science

H.SC with 79.17%

2019-2021

Career Development Period

Focused on developing practical skills in Data Analytics, Data Science, Machine Learning, Python, SQL, PowerBI and MSEXcel .

2025-2026

SKILLS

- **BI Tools:** Power BI Desktop, Power BI Service, DAX, Power Query
- **Data Analysis:** Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis
- **Machine Learning :** Supervised Learning, Classification, Regression, Logistic Regression, Linear Regression, Decision Tree, Random Forest, Model Evaluation, Feature Scaling, Train-Test Split, Confusion Matrix
- **Databases:** SQL Server, MySQL
- **Programming:** Python, Pandas , NumPy, Matplotlib
- **Other Tools:** Microsoft Excel, GitHub, Tableau (Basic), Jupyter Notebook, Google Colab Notebook

PROJECTS

1. Quick Commerce Analytics | Python, SQL, Power BI

- Analyzed 5,000 quick-commerce orders to identify trends in revenue, orders, delivery performance, customer ratings, and purchasing behavior.
- Used Python and Pandas for data cleaning and exploratory data analysis.
- Applied SQL queries to analyze orders, revenue, companies, categories, cities, and payment methods.
- Developed an interactive Power BI dashboard with Total Orders, Revenue, AOV, Average Delivery Time, and Customer Rating KPIs.
- Created visualizations for monthly revenue, company performance, product categories, payment methods, and delivery efficiency.
- Tools: Python, Pandas, SQL, MySQL, Power BI
- GitHub : <https://github.com/Yuktapoojary03/Quick-Commerce-Analytics>

2. Student Performance Analysis | Python

- Performed exploratory data analysis on student performance data using Python.
- Used Pandas and NumPy for data manipulation and analysis.
- Created Matplotlib visualizations to identify performance trends and patterns.
- Applied data cleaning and basic analytical techniques to derive insights.
- Tools: Python, Pandas, NumPy, Matplotlib
- GitHub : <https://github.com/Yuktapoojary03/Student-Performance-Analysis/tree/main>

3. Credit Card Fraud Detection | Python, Machine Learning

- Developed a classification model to identify fraudulent and legitimate credit card transactions.
- Performed data preprocessing, feature scaling, exploratory data analysis, and class distribution analysis.
- Implemented Logistic Regression, Decision Tree, and Random Forest models.
- Evaluated models using Accuracy, Precision, Recall, F1-Score, and Confusion Matrix.
- Tools: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- GitHub : <https://github.com/Yuktapoojary03/Credit-Card-Fraud-Detection-/tree/main>

CERTIFICATIONS

- Data Analysis with Python (June 2024 – August 2024)
- Machine Learning With AI Using Python (October 2022 – December 2022)
- Fundamentals Of Python Programming (August 2024 – August 2024)
